Description Jackson's new book responds to the growing interest in systems ideas and their application, and builds on the success of his previous work with Bob Flood Creative Problem Solving. This book is different from existing texts in the systems field - it provides a clear introduction to the origins of systems thinking, concepts and the development of applied systems thinking and offers ...

emerge from this engagement with systems thinking better equipped to cope with complexity, change and diversity. This hope is based on the fact that systems thinking is holistic rather than reductionist and, at least in the form of critical systems thinking, does everything possible to encourage creativity.
