*The Yellow River: The Problem of Water in Modern China. Inside the Maoist years the North China Plain was re-engineered to make use of every drop of water for irrigation and hydroelectricity. As David Pietz reveals, China's metropolis progress, industrial enlargement, and agricultural intensification rested on compromised water belongings,...*

*The Yellow River: The Problem of Water in Modern China is an excellent study of modern Chinese state policy toward river management and the historical and ideological assumptions that have governed and constrained it. The book aims to provide a historical foundation for readers beyond an audience of historians who are concerned with contemporary environmental challenges in China.*

*The Yellow River had dried up on several occasions since the 1970s, but in 1997 the desiccation reached an unprecedented 400 miles inland from the river's mouth on the Bohai Sea. It is true that the inhabitants of the North China Plain have long struggled with water, at times with too much, but more persistently with too little.*
